PROFESSIONAL SUMMARY

Information Technology graduate with hands-on experience in hardware and software troubleshooting, web development, and AI integration. Skilled in diagnosing technical issues, system maintenance, and developing web-based solutions. Detail-oriented, adaptable, and eager to contribute technical expertise in an entry-level Technical Support, IT Specialist, IT Officer, Network Support role.

EXPERIENCE

Computer Technician & Web Developer (freelance) | 2023 - Present

- Managed computer maintenance and technical support for a local computer shop, performing system setup, hardware upgrades, troubleshooting, and preventive maintenance.
- Troubleshoot client PC issues and perform system reformatting using hardware-level techniques and tools like WinNTSetup, sergei strelec, RUFUS etc.
- Develop professional website portfolios for clients to enhance their career applications.
- Designed and developed a web-based Government Service Management System integrating AI-powered assistance using Dialogflow to automate scholarship inquiries.
- Provide technical support to students for academic activities, including debugging and network troubleshooting.

IT Specialist (Pertua) | November 2025 - April 2026

- Resolved technical issues for 20+ employees, reducing downtime through hardware and software support.
 - Performed printer maintenance, hardware/software setup for new PC builds, and router configurations.
 - Collaborated with supervisors to implement cost-effective technical solutions through analytical problem-solving.
 - Developed a web-based ID and calling card automation system with QR code integration, reducing manual ID processing and enabling real-time access to employee profiles and company information.
-
